C. Optional extended playtesting . . . 11

Already covered by automation . . . 12

These tests are for a person with an Android phone. They check what desktop automation cannot: real touch, real screens and safe areas, real audio and vibration, Android Back, interruptions, and installing over a previous build.

You do not need to replay every level. Every level's solvability and every rule are already checked automatically (see "Already covered by automation" at the end). The tests here use a few representative levels for each mechanic and mode.

Build under test

Field	Value
APK	build/tinystreet-v7-clarity-debug.apk
Package / version	com.tinystreet.sortrestore, 0.7.0, versionCode 7
SHA-256	see build/SHA256SUMS.txt (line for tinystreet-v7-clarity-debug.apk)
Previous build on the phone	v6 tinystreet-v6-polish-debug.apk (0.6.0 / 6), v5 tinystreet-ui-polish-r2-debug.apk (0.5.0 / 5) or older; all share the same signing certificate
Phone model / Android version	(fill in)
Screen (size, aspect, notch/punch-hole)	(fill in)
Navigation (gestures or 3 buttons)	(fill in)
Tester / date	(fill in)

How to record results

- Status: PASS, FAIL, BLOCKED (could not run) or NOT RUN. Everything starts as NOT RUN.
- Actual result: one short sentence, especially for FAIL.
- Evidence: a screenshot or screen-recording file name (Power + Volume-down for a screenshot).
- If anything fails, note the screen, what you tapped, and what you expected.

A. 15-minute smoke test

Run these first, in order, on a phone that already has your v3 or v4 progress.

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
S-01	v3/v4 installed with progress. Note your token count and highest level first.	Install the new APK over the old one (don't uninstall).	Android shows Update/Install; installation succeeds without "App not installed" or a signature conflict.		NOT RUN	
S-02	S-01 done	Open the game.	No crash. Home shows the same token count, the same café restoration, and Continue/Play with the right level. A loading screen briefly shows the cup logo.		NOT RUN	
S-03	S-02	Look at Home without tapping for 10 s.	Café shop front with awning; next-step card; Play button pulses gently a few times and stops; nothing flashes. All text readable; nothing cut off at the top (notch) or bottom (gesture bar).		NOT RUN	
S-04	S-02	Tap Play/Continue, play 3–4 moves.	The level opens with a short fade. Tapping a crate moves its front item to the right ticket or the counter, with a sound and a short vibration (if on).		NOT RUN	
S-05	In a level	Press and hold a crate, drag away, release elsewhere. Then press and hold, release on the crate.	Hold: item lifts, dashed line to its destination. Drag away: move cancelled. Release on crate: move made.		NOT RUN	
S-06	In a level	Tap Undo, then Hint, then Restart.	Undo reverses the last move. Hint shows "Thinking…" then lights a crate or ticket. Restart starts over. The Hint badge count goes from 1 to nothing after use.		NOT RUN	
S-07	In a level	Press Android Back. Then Back again.	First Back opens Paused; second Back closes it and you're still in the level.		NOT RUN	
S-08	In a level	Finish the level.	Within about a second: Level complete!, stars land, the score counts up, one breakdown line, tokens earned, then Next level (only primary), Replay and Café. No story popup covers it. Nothing is cut off and the card doesn't need scrolling.		NOT RUN	
S-09	Home	Open Levels. Tap a padlocked level.	Current level is teal with a play mark; completed levels show stars; locked ones are faint with a padlock. Tapping a locked level shows "Clear level N first to open this one."		NOT RUN	
S-10	Home	Open Restore. Tap Preview, then Hide preview. If affordable, tap Restore · N once.	Preview shows the next step in the café (PREVIEW label); hide returns it. Buying spends tokens once, celebrates, and shows the Choose the … picker.		NOT RUN	
S-11	Bell lesson (level 9) cleared	Open Challenges → Open the ledger → open One Bell.	Night-blue ledger with stamps and page cards. The page shows the strip (Bells, Moves, Serve order).		NOT RUN	

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
S-12	Anywhere	Settings → turn Reduce motion on, go back to Home, then turn it off again.	With it on: no screen slide, no pulsing; everything still works.		NOT RUN	
S-13	Anywhere	Swipe home (background) for 10 s, reopen.	Same screen and state as before.		NOT RUN	

A2. v7 gameplay loop (score, result, failure)

Use a fresh install for G-01 to G-03 (uninstall first, or use a second phone); the others work on any save.

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
G-01	Fresh install	Open the game; tap through Mira's welcome.	Level 1 opens directly. Under the title: "Opening up · Goal: serve all 2 orders". The strip reads Orders 0/2 · Score 0 · Counter 0/3.		NOT RUN	
G-02	G-01	Follow the glowing crate.	Each delivery shows a "+10" pop-up and the Score rolls up; a finished order shows "+25".		NOT RUN	
G-03	G-02	Make the last delivery; immediately tap a crate, Undo and Restart several times.	Level complete! still appears (taps are ignored once won). Tokens shown (+3 or +4). Then tap Next level: Mira's "first customer" line appears after the card, then Level 2 opens.		NOT RUN	
G-04	Level 2	Fill all 4 counter spaces with items no order wants yet.	The Counter readout says FULL 4/4 and the status line says only items an order needs can move. The game is not over while any crate's badge shows a ticket number.		NOT RUN	
G-05	Level 4 (Theo's level)	Tap items that no order needs until the counter fills and nothing fits.	No moves left with a reason (e.g. "The counter is full (3 of 3)..."). Retry level is the big button; Undo last move is below. No tokens are paid.		NOT RUN	
G-06	G-05	Tap Retry level.	The card closes; the level restarts with Score 0, Counter 0/3, and crates respond to taps.		NOT RUN	
G-07	Any level, mid-way	Note the Score. Tap Undo twice, then redo the same two moves.	The Score drops with each undo and returns to exactly the noted value, never higher. Restart sets it to 0.		NOT RUN	
G-08	A cleared level	Replay it and finish with a higher score, then again with a lower one.	First: New best! Second: "Best N". Replays with the same stars pay no tokens ("No new stars, so no new tokens").		NOT RUN	
G-09	After G-03	Swipe the app away (close it) and reopen.	Level 1 still cleared with its stars and tokens; Home's Play/Continue points to the right level.		NOT RUN	
G-10	Settings	Switch the language to Arabic; play one level to the result and one to a loss.	Strip, result and failure cards are in Arabic and right-to-left; numbers stay readable; nothing overlaps.		NOT RUN	

B. Detailed regression checklist

B1. Install, update and saved data

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B1-01	Old build with progress	Update over it (S-01).	Same stars per level on the map, same café, same extras, same bakery and ledger progress.		NOT RUN	
B1-02	Old build with non-default settings (e.g. music 30%, Arabic, larger text)	Update, open Settings.	All settings kept.		NOT RUN	
B1-03	A level left mid-way in the old build	Update, tap Continue.	That level opens at the same position.		NOT RUN	
B1-04	A ledger page left mid-way in v4	Update, open that page.	Attempt resumes (same moves). (If the page changed, a message says the attempt was set aside.)		NOT RUN	
B1-05	Optional, spare phone only	Fresh install (no old build).	Mira's two lines, then Level 1 with tutorial tips.		NOT RUN	
B1-06	Any	Settings → Reset progress → Cancel.	Nothing erased. (Do not confirm on your main phone.)		NOT RUN	

B2. First launch and returning player

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B2-01	Fresh install (spare phone)	Play levels 1–3 following the tips.	Gold ring shows what to tap; tip text sits above the crates, never covering them.		NOT RUN	
B2-02	Returning player	Close the app from the recent-apps list mid-level; reopen.	Continue returns to the same move.		NOT RUN	
B2-03	Home	Check the next-step card.	Shows "Next: ...", a bar, "N / M" or Ready!; tapping opens Restore.		NOT RUN	

B3. Every screen and navigation path

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B3-01	Home	Tap each top chip: Journal, (Shop), How to play, Settings; Back after each.	Each opens; Back returns to Home.		NOT RUN	
B3-02	Home	Tap each tile: Levels, Restore, Challenges; Back after each.	Each opens with its header; Back returns Home.		NOT RUN	
B3-03	Bakery/Ledger unlocked	Tap each next-door card on Home.	Opens Mira's Bakery / The Midnight Ledger.		NOT RUN	
B3-04	In a level	Pause → Level map.	Level map opens; Back goes Home; Continue resumes the level.		NOT RUN	
B3-05	In a level	Pause → Settings, change a setting, Back.	Returns to the level map path without losing the level (Continue resumes it).		NOT RUN	
B3-06	Win card	Tap Café; then Replay on another win; then Next level.	Each goes where it says, once.		NOT RUN	
B3-07	Home	Press Back on Home.	Leave the café? with Stay/Leave. Stay keeps you in the game.		NOT RUN	
B3-08	Journal	Switch Tasks, Awards, Progress.	Each tab shows; the active tab is teal.		NOT RUN	
B3-09	Settings	Open How to play, Credits & licences, Privacy & support.	Each opens and scrolls; Back returns to Settings.		NOT RUN	

B4. Representative levels for every mechanic

Use Levels to open each one (replay is fine).

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B4-01	Level 2	Play it.	Counter use: items with no order wait on the counter; "Counter n / m" updates; amber text when one space is left.		NOT RUN	
B4-02	Level 7 (fresh)	Tap a fresh (steaming) item that no order needs.	Refused with a shake and "Fresh items can't wait on the counter..."; badge shows a clock.		NOT RUN	
B4-03	Level 9 (bell)	Ring a ticket, then tap a crate.	Ticket turns gold; the item goes to the rung ticket; ringing again stops it; Undo takes back a ring.		NOT RUN	
B4-04	A level with paper bags (e.g. level 34)	Bring a bag to the front.	It unwraps with a small pop and its item is revealed.		NOT RUN	
B4-05	A level with a strapped crate (e.g. level 70)	Tap the strapped crate early; then serve orders.	Refused with "This crate is strapped shut..."; opens with a flash after the tagged number of orders.		NOT RUN	
B4-06	A two-part order level (e.g. level 53)	Complete part 1 of a two-part order.	Part 2 (under then) becomes active; the ticket shows 2/2.		NOT RUN	
B4-07	A special-order level (level 14 or 20)	Play it through.	Gold-framed SPECIAL ORDER ticket; story beat and one-time reward on the first win only.		NOT RUN	

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B4-08	Get stuck on purpose	Fill the counter until no move works.	No moves left card with Undo (free) and Restart (test builds also show a simulated ad option).		NOT RUN	

B5. Midnight Ledger: bell budgets and order sequences

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B5-01	Ledger open	Open One Bell; tap the book icon.	Rule card lists the rules with icons, including the bell budget.		NOT RUN	
B5-02	One Bell	Ring once; try to ring a second time.	Strip shows one bell crossed out; second ring refused with "No bell rings left on this page."		NOT RUN	
B5-03	The Last Shall Be First	Try to serve the last-listed customer first.	Refused with "Not yet: the ledger says … must be served first."; the strip's next face has a gold ring.		NOT RUN	
B5-04	Any puzzle	Open hint stage 1, then 2, then 3.	Stage chips show 1 Idea, 2 Bottleneck, 3 Move; stage 2 shows live facts; stage 3 highlights one move and says it is verified.		NOT RUN	
B5-05	Make a wrong move that can't be finished	Open hint stage 3 (or get stuck).	Stuck card offers Undo N move(s) to a solvable point; using it returns to a solvable position.		NOT RUN	
B5-06	Any page	Undo, then Redo; then make a different move.	Redo re-applies; after a new move Redo is greyed out.		NOT RUN	
B5-07	The Precise Hand	Finish in 9 moves.	Page solved card: stamp lands; precision badge row earned.		NOT RUN	
B5-08	A finished page	Tap Why this works.	Explanation plus "You found exactly…" or "Your route was different…".		NOT RUN	
B5-09	Mid-page	Pause → Back to café; reopen the page.	Attempt restored (same moves).		NOT RUN	

B6. Hints, undo, redo, restart and resume (campaign)

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B6-01	Any level	Use the free hint; tap Hint again.	Second tap offers a simulated ad (test build) or explains the free hint is used.		NOT RUN	
B6-02	Any level	Undo 5 times quickly, then Restart.	Each undo reverses exactly one move; no duplicated or lost items.		NOT RUN	
B6-03	Any level, mid-way	Force-stop the app (Settings → Apps → Force stop); reopen; Continue.	Same position.		NOT RUN	

B7. Rewards and duplicate-tap prevention

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B7-01	A task ready in the Journal	Double-tap Claim fast.	Tokens increase once; the task shows Claimed.		NOT RUN	
B7-02	Enough tokens for a step	Double-tap Restore · N fast.	Tokens spent once; one step restored.		NOT RUN	
B7-03	Win card	Double-tap Next level fast.	Opens the next level once (not two levels ahead).		NOT RUN	
B7-04	Any screen	Tap a navigation tile twice quickly.	One screen opens; Back returns once to Home.		NOT RUN	
B7-05	A completed level	Replay it with the same stars.	No new tokens ("No new stars, so no new tokens...").		NOT RUN	

B8. Restoration previews, purchases and persistence

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B8-01	Restore, a décor category open	Tap a different option.	Café shows it; coral Previewing bar with Keep and Revert.		NOT RUN	
B8-02	B8-01	Tap Revert.	Café back exactly as before; nothing saved.		NOT RUN	
B8-03	B8-01 again	Tap Keep; close and reopen the app.	The kept option is still shown.		NOT RUN	
B8-04	Previewing	Press Android Back.	Preview reverted; you stay on Restore.		NOT RUN	
B8-05	Enough tokens	Buy · N an extra; toggle Shown/Hidden.	Extra appears/disappears in the café; state kept after restart.		NOT RUN	
B8-06	Not enough tokens	Look at the step card.	Restore · N greyed; "N more token(s) needed..." shown.		NOT RUN	

B9. Background, closing, offline

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B9-01	Mid-level, during the fly-to-ticket animation	Press Home immediately; reopen.	No stuck item; state consistent.		NOT RUN	
B9-02	Mid-level	Lock the screen for 1 minute; unlock.	Same state; music resumes if on.		NOT RUN	
B9-03	Airplane mode on	Play a level, restore a step, open Daily.	Everything works offline.		NOT RUN	
B9-04	Mid-level	Receive a call or alarm (or open the notification shade).	Game pauses sensibly and resumes without lost moves.		NOT RUN	

B10. Sound, music, haptics and motion

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B10-01	Settings	Music slider to 0, then 100%.	Music silent, then audible; percentage label updates.		NOT RUN	
B10-02	Settings	Sound effects to 0; tap buttons and crates.	No effects; music unaffected.		NOT RUN	
B10-03	Settings	Vibration off; make moves.	No vibration. On: short taps.		NOT RUN	
B10-04	Reduce motion on	Open screens, win a level, restore a step.	No slides, pulses, flying items or confetti; results appear in place; nothing missing.		NOT RUN	
B10-05	Larger text on	Visit Home, a level, Restore, Ledger.	Text larger; nothing clipped or overlapping; buttons still fit.		NOT RUN	

B11. Screen size, safe areas, readability and touch

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B11-01	Phone with notch/punch-hole	Visit every main screen.	No text or button under the camera cut-out or the gesture bar.		NOT RUN	
B11-02	Any	Tap small targets: chips, level cells, switch, dock tools.	Each responds on the first tap; no accidental neighbouring taps.		NOT RUN	
B11-03	Any	Read body text at arm's length.	Comfortable without zooming.		NOT RUN	
B11-04	Any	Check states without relying on colour: switch On/Off word, ticked/padlocked options, crossed bells.	Every state also has a word or shape.		NOT RUN	
B11-05	Rotate the phone	Try landscape.	Game stays in portrait.		NOT RUN	

B12. Arabic / right-to-left

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
B12-01	Settings → Language → the Arabic option (right-hand button)	Visit Home, Levels, a level, Restore, Ledger, Settings.	Layout mirrored (back arrow on the right, text right-aligned); Arabic letters joined correctly; numbers readable.		NOT RUN	
B12-02	Arabic	Play a level.	Crate badges, tickets and dock work the same; Undo arrow points the right way.		NOT RUN	
B12-03	Arabic	Note awkward or wrong wording.	Arabic text is a draft awaiting review by a qualified translator; record notes, don't mark the language approved.		NOT RUN	

C. Optional extended playtesting

These are about feel, not correctness. Write short notes rather than PASS/FAIL.

ID	Preconditions	Steps	Expected result	Actual result	Status	Evidence
C-01	Any	Play 20 minutes of campaign in a row.	Notes: does the new look feel inviting? Anything tiring, noisy or distracting?		NOT RUN	
C-02	Home	Within 5 s of opening Home, say what to do next.	The Play/Continue action and next café step are obvious.		NOT RUN	
C-03	Ledger	Play two puzzles with the hint stages (see docs/EXPERT_PLAYTEST.md).	Answer the six ledger questions there.		NOT RUN	
C-04	Restore	Decorate a full theme, then revert part of it.	Confirm/cancel/keep/revert never surprised you.		NOT RUN	
C-05	Bakery	Play the bakery levels and restore a bakery step.	The bakery feels like part of the same street.		NOT RUN	
C-06	Any	Hand the phone to someone new for 5 minutes, without explaining.	Notes: where did they hesitate or tap the wrong thing?		NOT RUN	

Already covered by automation

So you don't have to replay everything, these ran on the desktop build (Linux, Godot 4.7.2, software rendering) for version 0.7.0. See TEST_REPORT.md for exact numbers.

- 148 unit and rule tests (rules, solver, score and undo/redo/restart, saves and the schema 4 → 5 migration, rewards, ledger constraints, scripts compile).
- Level validator: every shipped level (campaign, bakery, daily pool) replayed and solver-verified.
- All 96 campaign levels won through simulated taps on the real UI.
- New-player journey through real taps only: first win → result → next level, a genuine loss on level 4 → Retry, undo/restart score checks, stray taps around the result, replay, close/reopen, and the last level → finale. Run in English, Arabic, and at 720×1080 with large text and reduced motion.
- Scripted UI flows: mechanics, restore, bakery, ledger, navigation and Back, rewards, rapid tapping, layouts, and English/Arabic screenshots of every screen.

Not covered by automation (and why these phone tests exist): real touch accuracy, real fonts and display density, safe areas reported by real hardware, audio/vibration output, Android Back hardware/gestures, interruptions, and installing over an earlier build.
