This guide describes Tiny Street: Sort & Restore, version 0.7.0 (the "UI polish" build). Every screenshot was captured from this version of the game. The wording in bold matches the buttons and labels you see on screen.

The main guide is spoiler-free: it explains rules and screens, never the answer to a particular puzzle. Complete, verified walkthroughs are kept in a separate file, TINY_STREET_SOLUTIONS_APPENDIX.md. Appendix A at the end lists every level and page in the game, generated from the game's own data.

1. Install, update and start

Installing or updating on Android

The game is delivered as an Android app file (APK) while it is being tested.

1. Copy the APK to your phone (or download it there).
2. Open it from your file manager. If Android asks, allow your file manager to install unknown apps.
3. Tap Install (or Update if an earlier Tiny Street build is already installed).

> Important: update, don't uninstall. Installing a new build over an older one keeps your progress, stars, tokens, café and settings, because every build uses the same app ID and signing key. Uninstalling first deletes your saved progress.

The game works completely offline. It asks only for permission to vibrate. There is no account and no login.

First launch

On your very first launch, Mira (the café owner) says two short lines, and the game takes you straight into Level 1, a guided tutorial. Gold rings and short tips show you what to tap. You can skip a story bubble with Skip or tap to continue.

Coming back

Your progress is saved automatically after every move. When you return:

- Continue on the Home screen reopens the level you left, exactly where you were.
- If no level is in progress, the same button says Play and opens your next new level.
- Expert ledger pages and bakery levels also remember an attempt in progress when you leave them.

2. The Home screen

Home, a new café | Home, partway through | Home, café restored

Home is your café on Tiny Street. The café picture changes with every restoration step you complete, from boarded-up windows to a busy, lit café with neighbours at the tables.

Element	What it does
Token pill (gold coin + number), top left	Your tokens, the café's only currency. Earned by playing; spent on restoration.
Journal chip (open book)	Daily café tasks, awards and your progress. A coral number shows how many rewards are ready to claim.
Shop chip (+)	Appears only in test builds. It is a clearly labelled test store that never charges. Everything in the game is free.
How to play chip (?)	The rules, with the game's own icons.
Settings chip (gear)	Sound, comfort options, language and more.
The café	Your restoration progress. Neighbours visit once the counter is restored.
Next-step card ("Next: ...")	The next restoration step, with a bar showing your tokens against its cost. Shows Ready! when you can afford it. Tap it to go to Restore.
Next-door cards	Mira's Bakery and The Midnight Ledger appear here once you unlock them, with their progress. A coral dot marks something new or ready.
Play / Continue	The main action: your next level, or the one in progress. It shows the level number and chapter.
Levels tile	The level map.
Restore tile	Café restoration and decoration. A coral dot means you can afford the next step.
Challenges tile	The Daily puzzle, challenge cards, Café Rush and the Midnight Ledger. A coral dot means today's Daily is not yet played.

Tokens, stars and badges

Reward	How you earn it	Used for
Stars (1–3 per level)	Finishing a level (see Stars in section 3).	Each new star earns 1 token (once per star). Your total is on the level map.
Tokens	1 per new star, +1 for a new mastery ribbon, café tasks, awards, challenge cards.	Restoring and decorating the café and the bakery.
Mastery ribbon (teal rosette)	Finishing a level with the tidiest possible counter and no hint.	Pride, and 1 token the first time.
Ledger stamp and badges	Midnight Ledger pages (section 9).	A collection; they pay no tokens.

The Daily puzzle, Café Rush and the Midnight Ledger never pay tokens, so you never need them to progress.

3. How to play

The goal

Fill every customer's order using the products in the crates. There is no timer and no move limit in the campaign. Take as long as you like.

A level in progress

Pressing and holding a crate

The puzzle screen, top to bottom

Part	What it shows
Pause chip (‖)	Pauses: Resume, Restart, Settings, and Level map (campaign) or Back to café (other modes). The star rules for the level are listed here too.
Title, chapter and goal	The level number, its chapter and the goal, e.g. "Level 53" over "Two-part orders · Goal: serve all 6 orders".
How to play chip (?)	Opens the rules. (In expert mode this is the Rules card, a book icon.)
Orders · Score · Counter strip	Three readouts that are always visible. Orders 1/6: orders served so far, with a small bar. Score: points for this attempt (see "Score" below); it counts up as you serve. Counter 2/3: spaces in use; it turns amber at one space left and reads FULL when full.
Next: queue	The next customers waiting and the first thing each will ask for.
Order tickets	Up to three customers at once. Each ticket has a number (1, 2, 3), the customer's face, the items they want, and one circle per item (filled with a tick when it arrives). A second part, if any, is shown under then.
Counter	The holding counter. Items wait here until an order needs them.
Status line	Short messages: why a tap was refused, a hint, or "Counter full: only items an order needs can move now".
Crates	Each crate shows its whole stack. Only the big front item at the bottom can be taken.
Dock: Undo, Hint, Restart	Tools. Undo and Restart are always free. The coral number on Hint is your free hints left.

Tapping a crate

Tap a crate to send its front item where it belongs. Before you tap, the small round badge on the front item tells you where it will go:

Badge	Meaning
A number (1, 2 or 3)	It goes straight into that order ticket.
Three little blocks	It goes to the counter to wait.
A clock	A fresh (hot) item that has nowhere to go yet; it must wait in its crate.
A cross	Nowhere to go right now. Tapping does nothing.

Press and hold a crate to preview: the item lifts, a dashed line points to its destination, and that ticket or counter space lights up. Let go over the crate (or drag to the destination) to make the move; drag away and let go elsewhere to cancel.

Where items go

1. An item goes to the leftmost order (lowest ticket number) that still needs it.
2. If no order needs it, it waits on the counter, if there is space.
3. When an order needs something that is waiting on the counter, it moves over by itself.
4. A finished order leaves with a tick, and the next customer in the queue steps up.

Consecutive moves that go straight into orders build a little streak ("Nice!"). Streaks are just for fun; they never change stars.

Getting stuck

A full counter is not game over. While the counter is full you can still tap any crate whose front item an order needs (its badge shows a ticket number).

You only run out of moves when no front item fits an order or the counter. Then the No moves left card appears and says why, for example "The counter is full (3 of 3) and no crate's front item is wanted by an order". Retry level starts the level again; Undo last move (free) takes back your last move so you can try another route. A loss never costs anything, and nothing is unlocked.

Levels 1–3 can't be lost. From level 4 on, the order you tap things in matters.

> In test builds you may also see Extra counter space (watch ad) or Watch a short ad for a hint. These use a simulated ad that never contacts an ad network.

Score

The Score counts points for this attempt only:

You...	Points
serve an item straight from a crate into an order	+10
serve an item from the counter	+5
finish an order	+25
finish the level: each counter space you never used	+10

Small "+10" / "+25" pop-ups show where you earned them. Tapping, ringing a bell, undoing or using a hint earns nothing by itself; Undo takes the points of that move back. The level's best score is kept, and the result card says New best! when you beat it. Points are for bragging only: stars rate the finish and

pay tokens, and tokens restore the café.

Stars

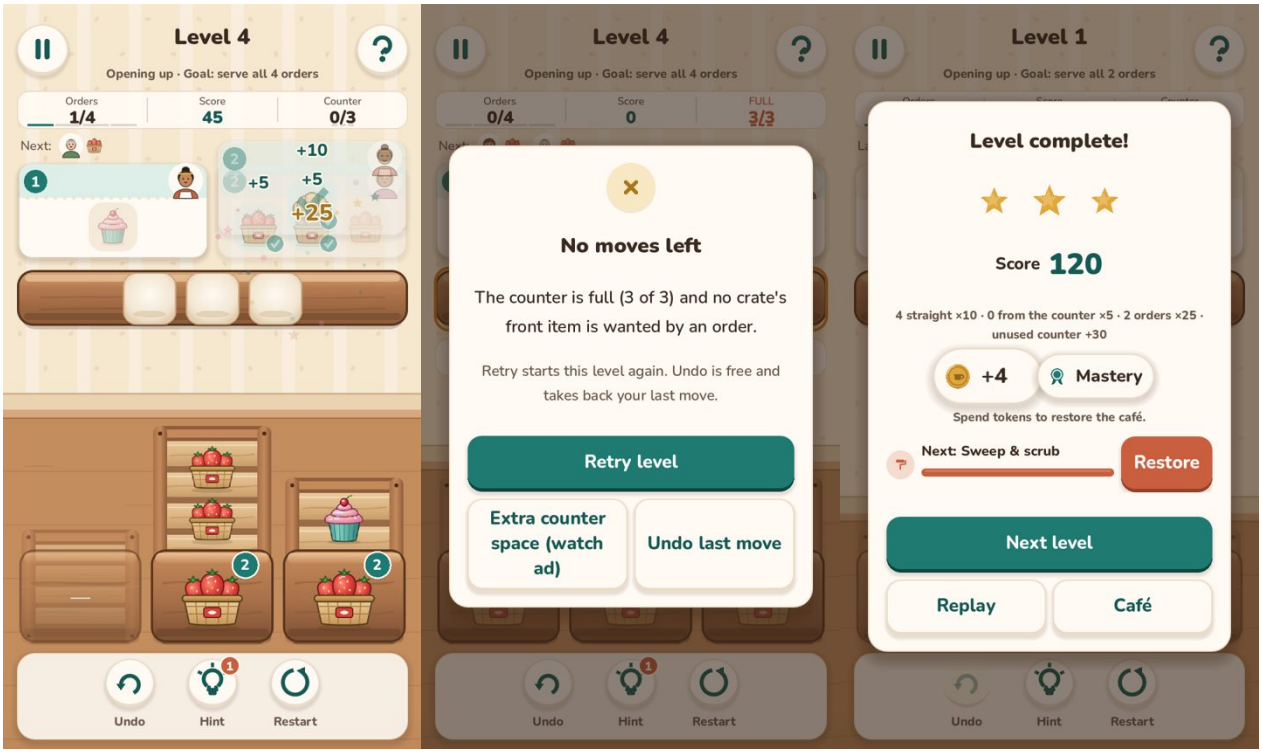

Every level shows its star rules (and the points rules) in the Pause card:

- 1 star: complete the level.
- 2 stars: keep your peak counter use at the level's target or less.
- 3 stars: also use at most 1 undo and no extra counter space.

Hints never affect stars. When you get fewer than 3, the result card tells you how to earn more.

Hints, Undo and Restart

- Hint: one free hint per attempt. The game works it out from your current position and lights up the crate to tap (or the ticket bell to ring). If your position can no longer be finished, it tells you how many moves to undo. Restarting gives you a fresh free hint.
- Undo: free and unlimited. It restores everything, including automatic deliveries and the bell.
- Restart: free. Starts a new attempt of the same level.

Playing: goal, orders, score and counter | No moves left | Level complete

Finishing a level

About half a second after the last delivery, the Level complete! card appears. It shows your stars, your score counting up (with New best! or your best), one line on where the points came from, the tokens you earned (each new star pays 1 token, once; replaying for the same stars pays nothing), one tip, and your next café step, with a Restore key when you can afford it. Next level is the main action; Replay and Café sit side by side underneath. On the last level the main action is Celebrate the grand finale.

If finishing the level unlocks a story moment (your first customer, a special order), it plays after the card, when you pick an action.

4. Mechanics

The campaign introduces one new idea at a time. Each first appearance has a short tutorial tip, and its level carries a gold NEW tag on the level map until you clear it.

The bell

The bell lesson

Every order ticket has a small bell. Tap a ticket to ring its bell: that customer is now served first, from the crates and from the counter, even if another ticket is further left. The ticket turns gold and its bell is filled in.

- Tap the same ticket again to stop the bell, or ring another ticket to move it.
- The bell stops by itself when that order is served.
- Ringing is not a move in the campaign, and Undo takes it back.
- The crate badges update the moment you ring, so you can see the effect before tapping a crate.

The bell is introduced in the chapter Ring the bell (level 9). The eight levels of Opening up before it don't have a bell.

Fresh (hot) items

Fresh items

Items with steam and a dashed coral ring are fresh. They must go straight into an order and can never wait on the counter. If no order needs one yet, it stays in its crate (its badge shows a clock) and blocks the items behind it.

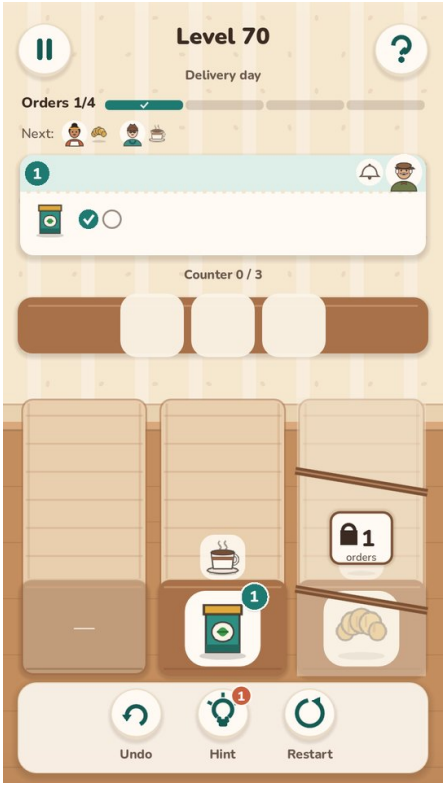

Paper bags

Paper bags

A paper bag with a "?" hides its item until it reaches the front of the crate. The rules always know what is inside; you find out when it is unwrapped.

Strapped crates

A strapped crate

A crate with straps and a padlock tag stays shut until the number of orders on its tag has been served. You can see what is inside, but you can't take anything until it opens.

Two-part orders and special orders

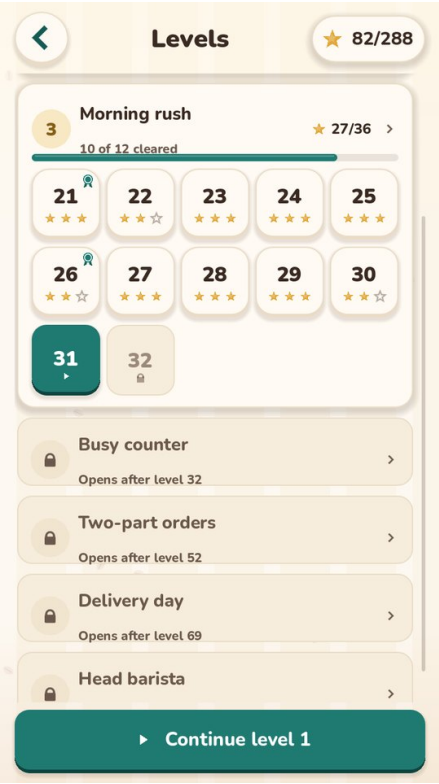

Two-part orders

Some customers order in two parts. The second part is shown under then and begins as soon as the first part is complete; the ticket shows "1/2" or "2/2". A few longer levels include a SPECIAL ORDER: a three-part order from one of the regulars, with a gold frame and a one-time reward (for example a chalkboard menu for the café, or opening Mira's Bakery).

Ovens (Mira's Bakery)

In the bakery, some crates are ovens: they open after the number of orders on their tag, and the hot pastries inside must go straight to a ticket.

5. The level map and progression

The level map

The campaign has 96 levels in 7 chapters: Opening up, Ring the bell, Morning rush, Busy counter, Two-part orders, Delivery day and Head barista. Levels open one after another: clear a level to open the next.

Open the map with Levels on Home. The star pill at the top shows your total stars.

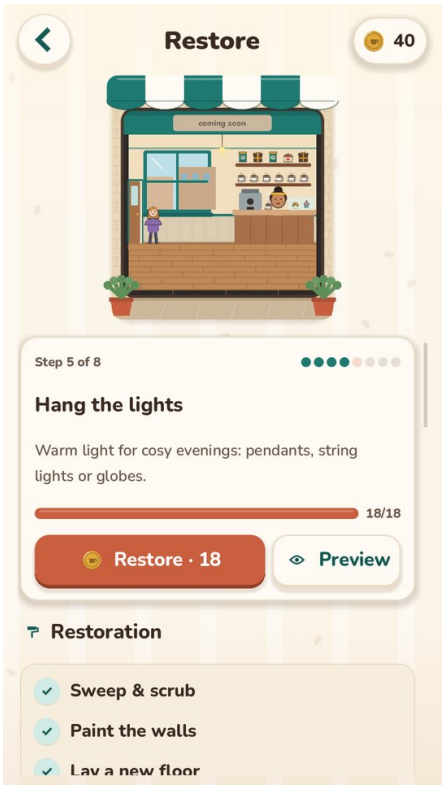

On the map	Meaning
Chapter card	Chapter number, name, "N of M cleared", stars earned, and a progress bar. Tap the chapter header to show or hide its levels.
Teal level with a play mark	The current level: the next one to play. It gently pulses a few times when the map opens.
Paper level with three stars	A completed level; gold stars are earned, outlines are not.
Teal rosette in the corner	Mastery earned on that level.
Gold NEW tag	The level introduces a new mechanic.
Small gold bell	The bell lesson or a level with a special order.
Faint level with a padlock	Locked. Tap it to see which level to clear first.
Locked chapter	Shows "Opens after level N".

Finished chapters fold to one line to keep the map short; the chapter you are playing is open. The Play level N button at the bottom always takes you to your next level. You can replay any completed level to improve its stars; extra stars still earn tokens (once each).

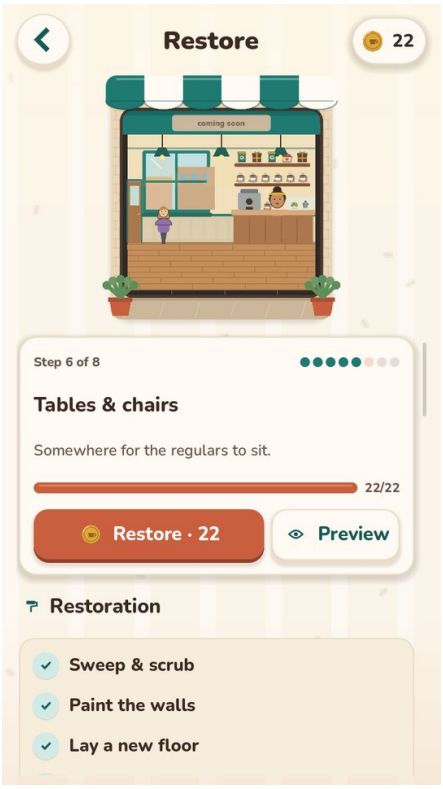

Mastery

The win card tells you the mastery target, for example "Mastery: finish with the counter never above 1 and no hint." Mastery is optional; nothing requires it.

6. Restoring and decorating the café

Restore

Choosing a look

Open Restore from Home (or tap the next-step card). Your token total is in the top-right pill.

Restoration steps

The café has 8 steps, bought in order: Sweep & scrub, Paint the walls, Lay a new floor, Counter & espresso machine, Hang the lights, Tables & chairs, Plants & window box, and New sign & grand opening. The step card shows "Step N of 8", a row of dots (done steps teal, the next one ringed), what the step does, and a bar of your tokens against the cost.

- Restore · N (with a coin) spends N tokens and completes the step. The café celebrates. If you can't afford it yet, the button is greyed and the card says how many more tokens you need.
- Preview shows the café with the next step done, without spending anything. Hide preview turns it off. A "PREVIEW" label appears on the café while you are previewing.

Choosing a look

Most steps unlock a decoration choice (wall colour, floor, counter, lights, seating, plants, sign). Right after buying a step, the Choose the … card appears with the options under it.

- Tap an option to see it in the café. Nothing is saved yet: a coral bar appears saying Previewing "Not saved until you keep it".
- Keep saves your choice. Revert puts the café back exactly as it was. The Android Back button also reverts a preview.
- Each option shows a colour swatch where it has one. A tick marks the option shown now; a padlock marks options you can't use yet, with the reason (for example an award to earn, or the test store).

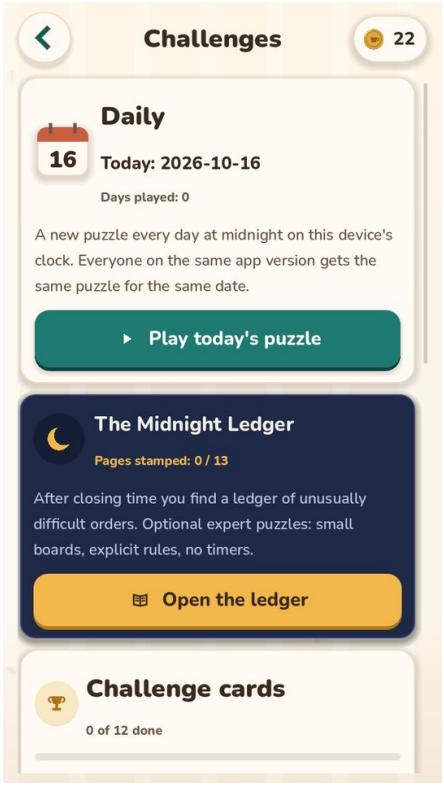

Switching between options you own is always free, and you can change them any time later in Decor (change any time).

Themes (preview, then keep) apply a coordinated look (Classic, Garden, Parisian, Harbour) over every step you have restored. They preview first, like single options.

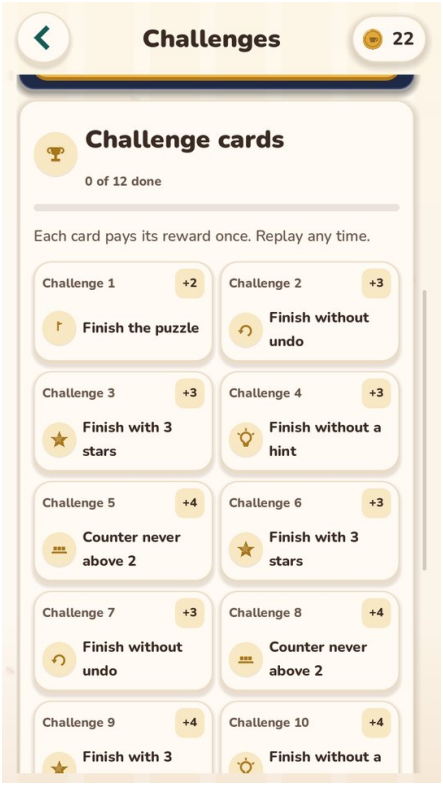

Extras

Extras are optional café details: Wall clock, Cake stand, Gramophone, Pip the café cat, Photo wall, Chalkboard menu, Bread basket and the Midnight Lantern. Each has Preview and, when it can be bought, Buy · N. Some extras are rewards instead: from an award, a special order, the bakery, or (the Midnight Lantern) from stamping every Midnight Ledger page. Owned extras show Owned and a Shown / Hidden switch.

7. Challenges, the Daily puzzle and Café Rush

Challenges

Challenge cards

Open Challenges from Home.

Daily

A new puzzle every day at midnight on your phone's clock. Everyone on the same app version gets the same puzzle on the same date. The card shows the date, how many Days played (it never resets), and either Play today's puzzle or, once done, your stars and moves with Share result (copies a short result, with no personal data, to paste anywhere) and Play again (for fun). The Daily awards no tokens.

The Midnight Ledger card

Shows your stamps and Open the ledger. Before it opens it says which level unlocks it.

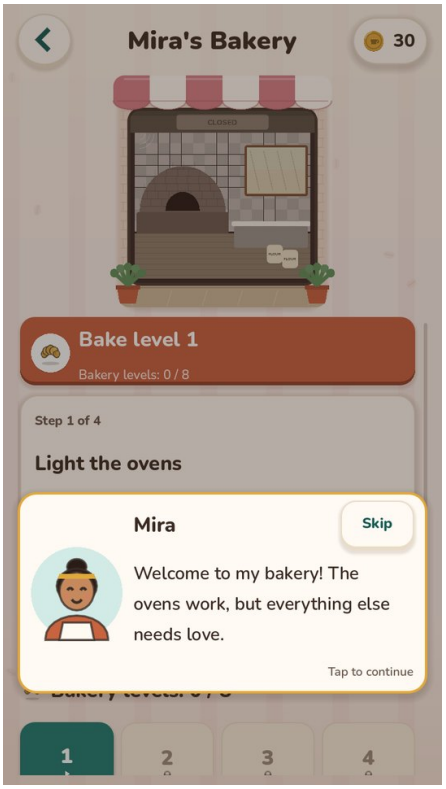

Challenge cards

Twelve cards, each a puzzle from the Daily pool with one goal: finish, finish with 3 stars, finish without a hint, finish without undo, or keep the counter at or below a number. Each card shows its goal with an icon and its reward ("+3"). Meeting the goal pays the reward once and marks the card Done; you can replay any card at any time. The cards open after the bell lesson.

Café Rush

Three puzzles back to back. The clock only counts up and there is no way to fail; it's just your personal best. Start the Rush begins a run with three random puzzles from the Daily pool.

8. Mira's Bakery

Mira's Bakery

A bakery level

Serving Mira's special order (in the Ring the bell chapter) opens Mira's Bakery next door. It appears as a card on Home.

- Bake level N plays the next bakery level. Bakery levels use the campaign rules plus ovens, and they earn stars and tokens like campaign levels.
- The bakery has its own 4 restoration steps (Light the ovens, Bread shelves, Striped awning, Bakery sign & opening) with Restore · N, and decoration choices for Shelves, Awning and Sign emblem (switch freely between what you own).
- The 8 bakery levels are listed at the bottom with the same states as the level map.

9. The Midnight Ledger (expert mode)

The ledger | A ledger page | The rule card

After closing time, the café owner finds a ledger of unusually difficult orders. The Midnight Ledger is an optional collection of 13 expert puzzles: small boards, every order visible, explicit rules and no timers. It opens after the bell lesson. It pays no tokens, and nothing else in the game depends on it.

The difficulty labels for these pages are provisional: they are the designer's estimates until people have played them.

Lessons, puzzles and the final page

Group	Pages	Opens
Lessons	3	One after another.
Puzzles	9	All at once, after the three lessons.
The final page	1	After any six puzzles.

Each page card shows its number, name, the idea it explores, and, once finished, Stamped plus any badges. Locked pages say what opens them.

The two expert rules

Ledger pages use every café rule, plus one or both of these:

- Bell budget: you may ring bells at most N times on this page. Every ring counts, including ringing again to stop a bell. When the budget is used up the bells are crossed out, and tapping a ticket says "No bell rings left on this page."
- Order sequence: some customers must be served in a set order. Any tap whose result would serve one of them too early (including the automatic deliveries it would trigger) is refused with "Not yet: the ledger says … must be served first." Other customers can be served at any time.

The ledger strip

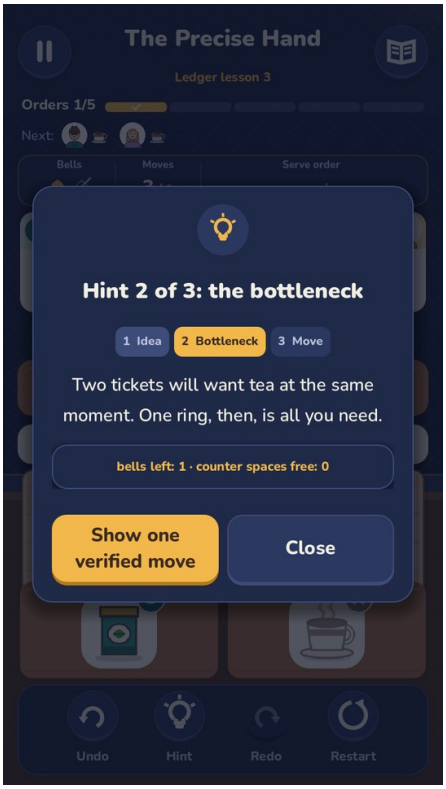

Under the order bar, a midnight-blue strip shows:

Section	Meaning
Bells	One bell per ring allowed; used rings are crossed out. "∞" means unlimited.
Moves	Your move count. Where a precision badge is offered, the target is shown as "/ 9".
Serve order	The sequence as faces, in order. Served customers get a tick; the next one has a gold ring. "any order" means this page has no sequence.

A move is one crate tap or one bell ring in your final sequence. Undone moves don't count.

The Rules chip (book icon) opens the page's rule card at any time.

Hints in three stages

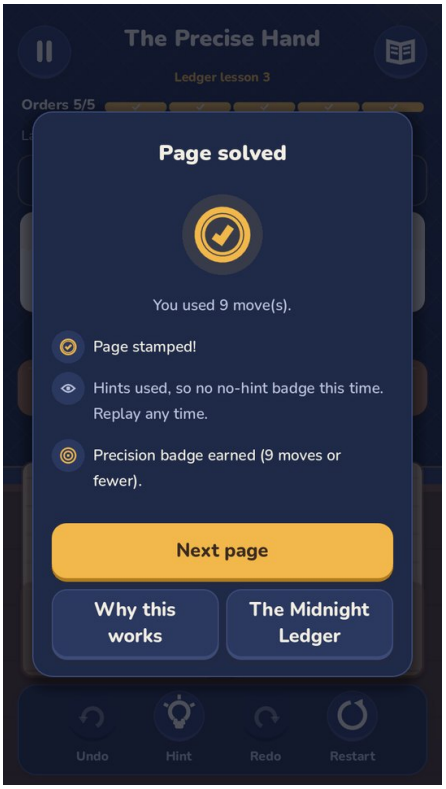

Hint stage 2

Tap Hint for help in stages: 1 Idea (a nudge about the key idea), 2 Bottleneck (a more specific explanation plus live facts: bells left, who is next in the sequence, free counter spaces), and 3 Move (one verified next move, highlighted on the board). A move is only shown when it is proven to lead to a solution. It never guesses, and it never shows the whole answer. Opening any stage means no no-hint badge for that finish, but you can always finish the page.

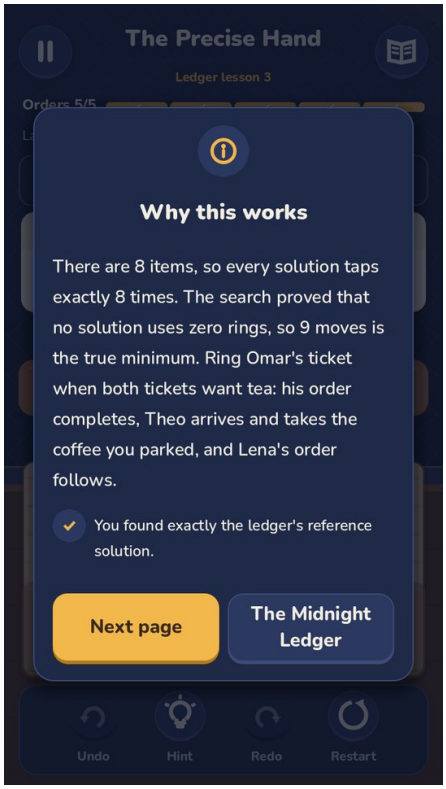

Undo, Redo, Restart and recovery

The ledger dock adds Redo (re-applies an undone move; any new move clears it). If you reach a position that can no longer be finished, the Stuck card offers Undo N move(s) to a solvable point (back to the last position on a proven solution), Undo (free) and Restart. If the quick search can't decide, it says so honestly instead of guessing.

Stamps, badges and the Midnight Lantern

Page solved

Why this works

- Stamp: for finishing a page the first time.
- No-hint badge: for finishing without opening any hint stage.
- Precision badge: on the two pages that offer one, for finishing in the proven minimum number of moves.
- Midnight Lantern: a café extra for stamping every page.

Each reward is given once; replays never change them. After finishing, Why this works explains the page's idea and tells you honestly whether your route matched the ledger's reference solution or was a different valid one.

Leaving a page keeps your attempt (moves, redo and hints used). If a page is updated in a later version, an old saved attempt is set aside with a message rather than loaded against different rules.

10. Journal, settings and saving

Journal

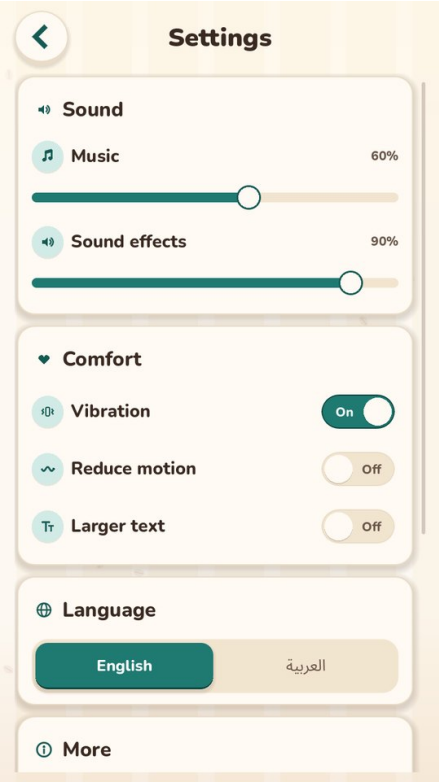

Journal tasks | Awards | Progress

Open the Journal chip on Home. Three tabs:

- Tasks: three small café tasks a day (any puzzle counts). Each shows progress and its reward; Claim pays it once. Tasks change at midnight on your phone's clock.
- Awards: the achievement collection, with progress bars for locked ones and Claim for earned ones.
- Progress: chapter-by-chapter progress and stars, café steps, extras, awards, Daily days, challenge cards, ledger stamps, your best Rush time, and story replays of scenes you have already seen.

Settings

Settings

Setting	Effect
Music, Sound effects	Volume sliders (0–100%).
Vibration	Short taps of vibration on moves and rewards.
Reduce motion	Removes movement: no screen slides, pulses, flying items or confetti; things appear in place instead.
Larger text	Makes every text about 15% larger.
Language	English or Arabic (right-to-left layout). The Arabic text is a draft awaiting review by a qualified translator.
More	How to play, Credits & licences, Privacy & support.
Reset progress	Erases levels, stars, tokens and café restoration on this device after a confirmation. Settings and purchases are kept.

Saving and resuming

- The game saves after every move and every reward, and again when you leave or switch apps.
- Closing the app, a phone call or the screen turning off never loses more than the move you were making.
- Rewards are recorded so they can be paid only once: replaying, reloading or double-tapping never duplicates tokens.
- If the save file is ever damaged, the game restores a backup copy and tells you.

The Android Back button

Where	Back does
A card or dialog	Closes it (the level-complete card waits for a choice).
A story scene	Skips it.
Playing a level	Opens Pause.
Previewing in Restore	Reverts the preview.
Any other screen	Goes back one screen.
Home	Asks Leave the café? with Stay and Leave.

11. Common mistakes and troubleshooting

Problem	What's happening and what to do
"Tapping a crate does nothing."	Check the badge on its front item. A cross means it has nowhere to go; a clock means it is fresh and must wait; a strapped crate opens later. The status line explains every refusal.
"The item went to the wrong order."	Items always go to the leftmost order that needs them. Ring the bell on the ticket you want served first. Press and hold to preview before you let go.
"My counter keeps filling up."	Send items straight to orders where you can, and leave space for items you'll need soon. The counter caption turns amber when one space is left.
"I'm stuck."	Undo is free and unlimited. Hint tells you how many moves to undo if your position can't be finished.
"Not yet: the ledger says … must be served first."	An expert-page sequence. Serve the customer named first, or ring a bell to redirect the cascade (if bells are left).
"I can't ring the bell."	The bell isn't available in the first tutorial levels, and expert pages may have a bell budget that is used up.
"I can't afford the next restoration step."	Earn tokens: new stars (replay levels for more), mastery, café tasks, awards and challenge cards.
"I picked a colour by mistake."	Choices only preview until you tap Keep. Owned options can be switched any time for free.
"My ledger attempt disappeared."	The page was updated in a new version, so the old attempt was set aside. Start the page again.
"The Daily changed."	It follows your phone's date. Changing the clock changes the puzzle.
"Things move too much." / "Text is too small."	Turn on Reduce motion or Larger text in Settings.
"I lost my progress after reinstalling."	Uninstalling deletes local progress. Always install new builds over the old one.

This guide describes version 0.7.0. Generated level data: Appendix A. Spoilers: the separate Solutions Appendix.

Appendix A: Every level and page

Generated from the game's level files for version 0.7.0 (tools/build_guide_appendix.py). Campaign 96 levels, Mira's Bakery 8, Daily/Rush pool 60, challenge cards 12, Midnight Ledger 13 pages.

Columns: Objective counts orders, order tickets on screen at once, and counter spaces. Special rules names the mechanics the level uses. Unlock conditions follow the game's rules: campaign levels open one after another; bakery levels open one after another once the bakery is open; ledger lessons open in order, puzzles after the three lessons, and the final page after any six puzzles.

Campaign

Opening up (levels 1–8)

ID	Display name	Mode	Objective	Special rules	Unlock condition
c001	Level 1	Campaign	Serve 2 orders · 1 ticket · counter 3	Tutorial: tapping crates; bell not available	Available from the start
c002	Level 2	Campaign	Serve 3 orders · 1 ticket · counter 4	Tutorial: the counter; bell not available	Clear level 1
c003	Level 3	Campaign	Serve 4 orders · 2 tickets · counter 3	Tutorial: which order gets an item; bell not available	Clear level 2
c004	Level 4	Campaign	Serve 4 orders · 2 tickets · counter 3	bell not available	Clear level 3
c005	Level 5	Campaign	Serve 3 orders · 2 tickets · counter 3	bell not available	Clear level 4
c006	Level 6	Campaign	Serve 4 orders · 2 tickets · counter 3	bell not available	Clear level 5
f01	Level 7	Campaign	Serve 4 orders · 1 ticket · counter 3	Introduces fresh (hot) items; 2 fresh items; bell not available	Clear level 6
c007	Level 8	Campaign	Serve 4 orders · 2 tickets · counter 3	bell not available	Clear level 7

Ring the bell (levels 9–20)

ID	Display name	Mode	Objective	Special rules	Unlock condition
p01	Level 9	Campaign	Serve 4 orders · 2 tickets · counter 1	Introduces the bell	Clear level 8
p02	Level 10	Campaign	Serve 4 orders · 2 tickets · counter 2	—	Clear level 9
p03	Level 11	Campaign	Serve 5 orders · 2 tickets · counter 3	—	Clear level 10
p04	Level 12	Campaign	Serve 5 orders · 2 tickets · counter 2	—	Clear level 11
p05	Level 13	Campaign	Serve 6 orders · 2 tickets · counter 3	6 fresh items	Clear level 12
p06	Level 14	Campaign	Serve 5 orders · 2 tickets · counter 3	1 two-part order; special order from Theo (reward: chalkboard for the café)	Clear level 13
p07	Level 15	Campaign	Serve 5 orders · 2 tickets · counter 3	—	Clear level 14
p08	Level 16	Campaign	Serve 7 orders · 3 tickets · counter 3	—	Clear level 15
p09	Level 17	Campaign	Serve 7 orders · 2 tickets · counter 2	8 fresh items	Clear level 16
p10	Level 18	Campaign	Serve 6 orders · 2 tickets · counter 3	4 fresh items	Clear level 17
p11	Level 19	Campaign	Serve 6 orders · 2 tickets · counter 2	4 fresh items	Clear level 18
p12	Level 20	Campaign	Serve 6 orders · 2 tickets · counter 3	4 fresh items; 1 two-part order; special order from Mira (reward: opens Mira's Bakery)	Clear level 19

Morning rush (levels 21–32)

ID	Display name	Mode	Objective	Special rules	Unlock condition
c008	Level 21	Campaign	Serve 4 orders · 2 tickets · counter 3	—	Clear level 20
f02	Level 22	Campaign	Serve 4 orders · 2 tickets · counter 3	1 fresh item	Clear level 21
c009	Level 23	Campaign	Serve 5 orders · 2 tickets · counter 3	—	Clear level 22

ch12	Challenge 12	Challenge card (puzzle d058)	Serve 6 orders · 2 tickets · counter 3; goal: Finish with 3 stars; reward 5 tokens	1 two-part order	Clear level 9

Daily puzzle and Café Rush pool

The Daily puzzle is chosen from this pool by the device's local date (everyone on the same version gets the same puzzle on the same date). Café Rush plays 3 different puzzles from the same pool, picked at random each run. Both are available from the Challenges screen at any time; the pool itself never changes during play.
